

Wells Fargo and the various entities that Wells Fargo induced into crime victimized me from April 2019 through October 2020. At some time between March 2020 and October 2020, the Justice Department became part of the crime spree against me, and sponsored a cover-up. I have subsequently been victimized by Wells Fargo, the United States Department of Justice, Atrium Health, and other healthcare providers, who were corralled into the cover-up and the state sponsored crimes involved in it. The crimes continue up to the very recent past and possibly beyond. The initial crime spree took place during the exact same time that Wells Fargo was negotiating with the Justice Department about the fake accounts, which resulted in a deferred prosecution agreement. Subsequent to signing the deferred prosecution agreement, Wells Fargo continued to commit serious crimes against me, and eventually delivered the Justice Department evidence of a crime that would violate the terms of that agreement, subject to the qualification that "only the Justice Department can determine if a crime breaches the agreement", to paraphrase part of the related clause in the February 2020 deferred prosecution agreement.

A prosecution for the crimes committed against me would without a doubt pose an existential threat. Wells Fargo has been well aware that I have complained to the Justice Department, since not long after March 2020. Wells Fargo has been an active player, in the handling of this matter, which I submitted not to Wells Fargo but to the United States Department of Justice.

Note that Wells Fargo also delivered evidence of a serious crime committed against me to the Federal Reserve, and that the Federal Reserve took no action, other than to participate in this crime and issue demeaning remarks to me. This would seem to suggest that Wells Fargo may have a problematic relationship with the federal reserve. Wells Fargo and the regulators all know about my complaint and the crimes that they have committed.

I am getting very bad off. I cannot type any more of this. It is causing me terrible symptoms. You know what happened. I typed a letter over the past 3 days, I will paste it in the next box.

I ask that you make all files that I submit available through FOIA requests. I have submitted documents, files, and videos that contain my private medical information. For all of those documents, files, and requests, I waive my right to privacy. I do this because I need help, and I do this because Wells Fargo, the regulators, and the authorities, in a process that began long-ago, waived my privacy for me, without asking me, and as I was screaming and crying in horrible pain pleading for them to stop what they were doing.

Please refrain from using nonsensical excuses and/or pseudo plausible reasons that these files cannot be released to the public. If you are unable to ever, under any circumstance, adopt an adversarial mindset concerning Wells Fargo, you should at least relent in this practice of having an adversarial mindset and a dehumanizing attitude concerning the victims this bank's conduct.

I have said some really terrible things about my country, and some of it was done behind the backs of the people on the other side. I have recently been more open with my criticisms. I sent the Justice Department an audio where I laid it all out. I gave the qualification that those characterizations were generalizations based on my extremely atypical situation. What I have said is thus unfair and a misrepresentation in any other context.

What I will say here, to further clarify, is that I live in the greatest country ever to exist in all of history, and in this, I was given a tremendous blessing. I still live in the greatest country ever to exist in all of history. A standard of absolute perfection is unreasonable and also impractical. I want to live a life where I have good times and good experiences, and I want to live it in the country I have known and that I have learned to navigate. I have a strong preference for the familiar. With that said, I am no longer in a condition to fight this uphill battle, to have my dignity recognized. It may be best that I move elsewhere, where it is not so difficult. I killed myself to be the best person I could be, for over 20 years, and this is what it got me. The regulators and the authorities and the bank can have this country to themselves, and not have to be bothered by me. I have a friend that I need to help, who was horribly victimized. Part of me wants to get on very good terms with the people on the other end. You could be an asset in aiding with her matter. I am suffering very badly. I use automation of different types to aid me, and if further automated checks of the files I have submitted turns up with more missing files, I will send those as soon as I find them. Please make all files sent by me, in all my submissions, available to the public. Not including this submission, I have the following:
