Please help me

To: "Division, Criminal (CRM)" <Criminal.Division@usdoj.gov>

Whatever issue this situation creates, it is not my fault. I have been massacred with crime. I am a destroyed human being. I am ruined.

I ask that you take the outcome where I get nothing, and put that outcome in the trash can. This cannot be. My suffering will be just as intense as it is now, for the rest of my life. It is necessary that I get something out of this. It is morally necessary and it is made necessary by my suffering and the handicap that I now have as a result of what has occurred.

This is not a situation created by my conduct. It is a situation created by the conduct of others. Those others need to make it right. Direct your frustrations at those who are responsible for this conduct.

If you are reading this and it is your conduct, please just make it right.

I ask again that all abuse of me cease. I have been victimized and abused enough. It has been a nonstop massacre of me for almost 2.5 years.

I need my medication. We need to have a better process for handling this than taking away a disabled man's medication. I need my medications. I have been taking them for decades. They help me.

I have been extremely honest with you. This is part of a pattern over my life where I have been very honest in my dealings with people.

If I had to do it again, I would not contact the United States Department of Justice for help. It breaks my heart to say that. You seemed like such a good friend at first, and I wanted to be your friend. I still want you to be my friend and I still want to be your friend.

It breaks my heart that I am being subject to this abuse. I come to you for justice and you do this instead? Please be kind to me and please make this right.

I am being tortured with withdrawals as I type this. I cannot take any more abuse. I repeat, I cannot take any more abuse. Please cease all abuse of me. Please find a different way of handling this situation than abusing me. This is how this has been handled from the get go, by every last party involved.

It is easy to do this. I am disabled and I have autism and I am not physically strong. Just because it is easy doesn't make it right. It is wrong for you to do this. It was wrong for Wells Fargo to do this. It was wrong for atrium health to do this.
