If I could be locked up somewhere and have a comfy life wherever that is, that would work for me. I need a place like my apartment in Charlotte. I need to have my adderall and be able to take extras if I need them. You don't care to help me and are going to let me die, but that is one option. I have been massacred by a company that outweighs me by 200 million to one, and I am a ruined human being as a result. I get the death sentence because I worked for this bank. You are going to let me die and you also will not warn others of the dangers of working for this bank. I wish so bad that you wouldn't be this way.

Warmest Regards,
