Re: Impact on me

To: "Division, Criminal (CRM)" <Criminal.Division@usdoj.gov>

I'm not sure if I would have murdered him and her, but that's what I feared. I would feel horrible about it afterwards. There is something extremely bad wrong with me. Today is going to be another day of suffering, it looks like. Im trying to get my sleep schedule turned around. The other night didn't work, I slept too long and ended up getting up at 11:10 am. My target is 1 to 4 am.

Mom will be home soon and it will cause me terrible distress when she's here.

You are so accustomed to getting this barrage of emails. The day is likely to come where you will not receive any more. It may surprise you, although it should not. Some things are permanent and some things there is no taking back. You will regret it terribly, if and when that day comes. I am one of the toughest, if not the toughest human being I've ever known of. I'm still human. I am dying slowly. It does not feel slow, not exactly. I have an ongoing sense that I'm can't make it any longer. One more day feels like too much.

If I do not die of natural causes, I will see to it that you are found out. It may seem selfish to you, that I will not sit back and let this bank get away with murder. I don't see it that way, and I have been murdered. Make no mistake about it. My soul has been murdered and my body will not last much longer.

I will also write my book and tell my story. I will cry when I write my story, and the world will cry when they read it. One thing I get the sense of, at times, is that you are really clammed up. The reality of what I say is not sinking in. It will sink in one day. You will come to see the exact truth of what I say.

There is no good solution to this situation. The best thing is probably for me to die. If you give me \$10 billion like I want, I'll probably make it 1 year before I move overseas to die. I'm going to end up on a pacemaker. What I want to do is to learn and master stuff like before. Not being able to do that is torture, and I'm going to get worse and worse ill. I will be almost completely incapacitated in probably another 1 to 2 years. I may be wrong. It may be that if I had money to get medical care, these physical problems that I have would go away. I don't know. What I really need to do, I think, is exercise. Problem there is I have no room to do that in this apt, and I'm not sure if I could if I did have room. My mind gets extremely taxed and it does so very easily. doing just about anything will tax my mind. The only exception, sort of, is working on my computer. I can work on my Computer more than I can do anything else. Other things tax my mind very badly. I think that if I lifted weights, it would cause me terrible distress.

Warmest Regards,

Clint Williams
