Re: Here we go again

To: "Division, Criminal (CRM)" <Criminal.Division@usdoj.gov>, civil.feedback@usdoj.gov

"It was off the table before this"

- here I am mainly referring to freely getting Justice from the people on the other end. My phone constantly capitalizes the word justice and I'm sick of fixing it.

You can be compelled into getting me justice, I think. And that's what's going to have to happen. I'm going to have to put the United States of America in checkmate and then go from there. I've already put Wells Fargo in checkmate.

What I'm realizing here, and this is mostly a rehashed thought and realization that I've had for a long time, is that the entirety of this situation is a big, big problem that needs to be solved, and that in solving it, the justice department just gets in my way.

We have the following problems-

1. Wells Fargo massacred me with crime and left me permanently disabled, for no reason
2. I am permanently disabled and will not make it in life if someone doesn't help me
3. Wells Fargo is above the law. Wells Fargo is permitted to do as Wells Fargo pleases, as part of what is perceived to be a necessity by the authorities and regulators
4. Wells Fargo's impunity is viral. When Wells Fargo induces other parties into crime, those other parties catch the impunity bug. They become above the law. They are also permitted to do as they please and will not get punished
5. The impunity of Wells Fargo and those who Wells Fargo infects with impunity extends so far that Wells Fargo is permitted to murder other people. Wells Fargo, and presumably any other Wall Street bank that goes off the rails, has the de facto right to kill, for any reason or no reason at all, at its discretion. So does any other party that aids Wells Fargo in its crimes
6. Wells Fargo has crimed its way into a mess. Wells Fargo's reputation is suffering damage and it is approaching the point that it will be nearly impossible to recover from this reputation damaged
7. Wells Fargo's strategy is to crime its way out of the same mess that it crimed its way into. Wells Fargo is using its impunity as a sort of competitive advantage. Wells Fargo can make up for the difference between how its bank should be run and how its bank is run by committing crimes. When the mismanagement of the bank exposes the bank to a liability, the bank can cheat its way out of that liability through crime

8. I won't list them, but I know a lot about the bank's ethical shortcomings and how they need to be addressed

I'm getting weak again. I need to finish this. Will be back.

Warmest Regards,

Clint Williams
