I can't do anything because of this feeling of hostility and being tense and distressed and unendingly anticipating my mother's friend coming over. It's like my mind is hyperfocused on the threat he poses and this threat is constantly running in my mind. I told her 5000 times the distress this causes me when he's here and how I need to be by myself and how this situation is dangerous.

---

Warmest Regards,

Clint Williams
