"My mother is a psychopath magnet."

- you are law enforcement. You ought to use her. She's like a homing device for detecting the worst nightmare in the room. Find the one she likes best and bring him in for questioning, while his back yard is being excavated and searched with cadaver dogs. I was free from the nightmares she brings into my life, until I was kidnapped and forced to provide her number to atrium health.

Warmest Regards,

Clint Williams
