Re: Email for August 21, 2023

To: "Division, Criminal (CRM)" <Criminal.Division@usdoj.gov>, civil.feedback@usdoj.gov

"I am going to die as a result of what has happened to me."

-this feeling comes and it goes. I get incredibly distressed and I have the most horrible despair, at different times.

I'm not settling for a penny less than my last offer. I will eventually write up my terms. I have things outside of money. Money is the main thing, because I need my own place and I need to pay people to do what I can't do, etc. All of the things that I have told you over and over. And I deserve a nice life, for what has happened to me. What I'm asking for isn't really justice, but it will count for a lot. I will have gotten a lot out of my fight for justice, when there are people all over the place that are dealt complete injustice and/or who get nothing.

What I will do, when I get to that step, is write up an agreement in my own words, being the best lawyer that I can be. It will not be the final agreement but an agreement for the bank and whoever else to "agree to an agreement with substantially the same terms." Something like that I will phrase it. The purpose is so that I can get a lawyer to type up the final agreement. I will pay the lawyer well, but they can forget getting 30% for doing nothing. This is my fight, that I fought alone, except for my old psychologist John. He's the only one who ever helped me.

You want to keep this under wraps, I am sure. The best thing for you is for no one to know the actual facts of what has happened. We can do that, with the exception of my medical people. This will be my current medical people and any future medical people. They have a legal obligation to be confidential (the irony here doesn't escape me, as I say this). I have to be able to keep my evidence & evidence analysis materials, and to also make new ones, for the purposes of my medical people.

For your purposes, I will try to keep my medical people at a minimum, in terms of how many that I have. I will try not to get a new set of doctors too often. I'm good at picking people out. I also ditch people who don't have sufficient competence, and that's part of the purpose of being picky and doing my homework. I know what to look for.

It is possible, just maybe, if you want, that I allow you to debrief my medical people on this situation. I can imagine you wanting to keep tight control of it. It is such a threat to you. I'll have to think about this, because a big part of this is for you to be out of my life, completely. I can tell you that I would be good at keeping it under wraps.

Another party that may be privy to what has happened is NC DDS and the social security administration. I've already told them multiple times, and if my case is reviewed again, it's very likely that they see my evidence. They did something weird. They acted as if they believed me and then, at the same time, they acted as if they didn't believe me.

I get extremely mad thinking about this. I'm getting something, according to what I have proposed, but it's still a massive injustice and it bothers me very badly that these people will get away with this. The Charneck police

officer deserves to go to prison. So do so many others.

Warmest Regards,

Clint Williams
