I'm referring to if you show them my illegally obtained healthcare records. That's the context. Getting those healthcare records was a vicious and also a pointless crime. They worked for the bank. The justice department needed something that has absolutely nothing to do with the matter at hand, because the matter at hand is the end of the world, apparently, as the Justice Department sees it. Wells Fargo provided just that, a set of criminally obtained healthcare records that have absolutely nothing to do with the matter at hand.

I send a complaint about a bunch of vicious crimes and ruthless criminal abuse of a disabled man. I also include an airtight case, a case so strong that it shouldn't take long to get the gears of justice turning. Then for 3 years I have to sit here in a discussion about my healthcare records. This is the farce I have to deal with.

Warmest Regards,

Clint Williams
