I deleted my latest round of mean posts on Twitter. I started to feel like I was going to die and got mad. I don't know why you are this way. I want to have a constructive relationship with you, so that you can help my friend on Twitter. But you don't want to do that. You want to keep trying to kill me. I am coming very close to dying, or at least I feel that way. ChatGPT is giving me some nonsense about psychosomatic symptoms, but I don't think it is right. I feel like I'm about to die.
