I have wasted an entire day doing her taxes. It was absolute murder figuring it out and doing the math. I couldn't concentrate to read the rules on the irs pdf and ChatGPT gave me garbage information over and over. ChatGPT told me the wrong thing from the get go. If I would have been given accurate information, I could have done this in no time. It is just clicking buttons to put in your filing status, load duplicate info from last year, and then tweak a handful of numbers.
